## PROJECT COLOUR FLOOR - COURSE TEXTURE

Project Colour is the most comprehensive colour system ever developed for the professional design field. It greatly expands the expressive capabilities of contemporary interior design with new colours and more eloquent chromatic combinations.

Project Colour constitutes a whole new approach to colour, based on three different chromatic intensities; subdued tones, medium tones and brilliant tones.

Their incredible tonal versatility and range of chromatic intensity makes these tiles highly creative design tools.

*Project Colour Floor-Course Texture* is accompanied by *Project Colour Floor-Solid Colours* and *Project Colour Floor-Fine Texture*.

A glazed wall tile series; *Project Colour 200* is also available.

A series of decorative/special pieces accompanies this range. Please enquire for details.
