

**PROSPEC**

The essential resource for contract tile specification

**PROSPEC offers a complete portfolio of tile ranges to suit the architect and interior designer. Ranges include ceramic, porcelain and reconstituted marble, glass, mosaic and natural materials to suit all new build and restoration projects with a full technical back-up and complete sampling service.**

**Introduction** **PROSPEC** is a dedicated service for the requirements of professional specifiers in the commercial market place. It is presented by The Tile Studio Ltd, a company with over 24 years operating in the tile sector. It provides accurate and current information on products, technical advancements and new concepts in tile design. This is complemented by an online product library, complete sampling service and a portfolio pack - a valuable addition to a specifier's product information library.

**Authority** The company has Investors in People accreditation and is a member of The Tile Association.

**PROSPEC** only buys tiles from manufacturers for supply to specifiers that comply with the following standards:

**Products:** BS 6431, BS EN ISO 10545, pr ISO/FDIS 14411; **Adhesives & Grouts:** BS EN 12004 and BS EN 13888.

#### DESCRIPTION

**PROSPEC's** online service on [www.prospectiles.com](http://www.prospectiles.com) has been developed to provide the specifier with accurate and up to date information on products, technical advancements and new concepts in tile design. Whether the requirement is to specify tiles for domestic and residential environments or leisure, commercial or industrial projects, **PROSPEC** is able to provide solutions to enable specifiers to meet their design needs along with the budgetary requirements for the project.

**PROSPEC's** product range encompasses materials from some of the world's leading manufacturers, providing modern designs built upon the latest technological developments.

If, however, a specific product which is not contained within the portfolio is sought, **PROSPEC** can be contacted through its dedicated telephone line 0115 939 5903 or its online resource [www.prospectiles.com](http://www.prospectiles.com) and it will assist in fulfilling those requirements through its large and varied list of international manufacturers.

**PROSPEC** is able to supply a broad range of products and the online product selector has been designed

to assist in the specification process. The product pages have been split into three sections: *Wall Ranges, Floor Ranges and Special Ranges.* Each section contains subsections detailing particular product categories. These subsections contain the actual ranges along with images and technical information assisting with the product selection process.

**PROSPEC** products include:

- Ceramic wall and floor tiles
- Glazed, unglazed and anti-slip porcelain tiles for internal and external applications
- Project Colour - a complete series of plain and speckled porcelain tiles for large commercial projects; suitable for internal and external, walls and floors

- Technical Stone - reconstituted marble and quartz stone for high grade commercial projects
- Mosaic - a variety of ceramic, porcelain and glass mosaics
- Larger format glass tiles for walls and floors
- Swimming pool systems - complete solutions for pools and spas
- Natural materials - from slate and terracotta through to limestone, travertine, marble and granite
