STONES SERIES

Stones is a complete and dynamic assortment of technologically advanced porcelain tile offering the aesthetic appeal of natural stone.

The Stones series comes in 18 colours, each colour available in multiple format sizes. Each piece of Stones is mono-calibrated and rectified. It is as dynamic as natural stone, but more flexible, due to its superior technical performance features.

The surface of each piece of Stones represents a perfect synthesis: satin-smooth, natural and handsome as stone.

Stones provides the ideal material for a vast array of applications; from wall coverings to high-traffic floor installations as well as exterior building facades.

A series of decorative/special pieces accompanies this range. Please enquire for details.
